SUMMARY

Energetic and driven individual with a solid educational background and a passion for IT Sector and professional software employer. Known for strong problem-solving abilities, effective communication, and a collaborative mindset. Demonstrates a quick learning curve and a commitment to achieving goals. Eager to bring enthusiasm and a fresh perspective to a dynamic team and contribute to meaningful projects

EDUCATION

• Anna University Regional Campus, Madurai. 2022 – 2025

B.E. Computer Science And Engineering

• MSPVI Polytechnic College, Pavoorchatram. 2018 – 2020

Diploma in Electronics and Communication Engineering

SKILLS

Languages: Java, SQL, HTML5, CSS3, JavaScript

Frontend : React/Angular, Tailwindcss

Backend : JDBC, Hibernate, SpringBoot

Database : MySQL

Tools: Eclipse IDE, Github, VS code, Postman, My SQL Workbench, Maven

EXPERIENCE

The Planet Nine IT Service – Web Development Intern (On-site) March - May 2025

- Enhanced an interactive V11-QR Landing module for V11Tech.com, implementing scroll-based animations with Intersection Observer API for smooth user engagement.
- Designed and built a responsive service grid featuring multiple restaurant & retail categories with icons and hover effects, enhancing UI clarity and usability.
- Delivered a clean, scalable and reusable front-end component integrated seamlessly into the production website.

EduBridge (Capgemini CSR) – Full Stack Development Trainee (On-site) June 2025 – September 2025

- Built backend workflows using Java, Spring Boot, JDBC, and MySQL across 6+ modules.
- Focused on end-to-end application development, covering backend, frontend and best practices modern software engineering.
- Fixed 20+ coding issues to improve functional accuracy of assignments.

PROJECTS

Hospital Management System

- Engineered a web-based healthcare management dashboard to monitor hospitals, doctors, patients, and emergency cases in real time
- Implemented scalable CRUD operations with dynamic tables, charts, and validated forms
- Tech Stack: Spring Boot (Java) backend and MySQL database.

Cabin Staff Food Ordering System

- Designed and developed a responsive web-based food ordering system for college staff using Angular and Spring Boot.
- Enabling faculty to pre-order meals directly from their cabins.
- Implemented secure RESTful APIs for order and user management, integrated MySQL for storing staff, menu, and order data, and designed a responsive, user-friendly interface.
