**B.E computer science And Engineering**
  - MSPVI Polytechnic College, Pavoorchatram. 2018 – 2020  
**Diploma in Electronics and Communication Engineering**
- 

## SKILLS

**FRONT END** : HTML, CSS, Bootstrap

**BACK END** : Java , JDBC , Hibernate , SpringBoot

**DATABASE** : MySQL

**TOOLS** : Eclipse IDE , Github , VS code , Postman , My SQL Workbench , Maven

---

## WORKING EXPERIENCE

The Planet 9

JUNE - May 2025

### Frontend Developer — (Intern) V11 tech

- Enhanced an interactive V11-QR Landing module for V11Tech.com, implementing scroll-based animations with Intersection Observer API for smooth user engagement.
  - Designed and built a responsive service grid featuring multiple restaurant & retail categories with icons and hover effects, enhancing UI clarity and usability.
  - Delivered a clean, scalable and reusable front-end component integrated seamlessly into the production website.
- 

## PROJECTS

### Hospital Management System

- Designed and built a web-based dashboard to manage hospitals, doctors, patients, and emergency cases in real time.
- Created CRUD modules with interactive tables, charts, and forms to ensure smooth healthcare data management.
- Tech Stack: Spring Boot (Java) backend; MySQL database.

### Student Management System – Migration from JDBC to Hibernate ORM - Mini project

- Developed a CRUD-based student records application in Core Java and MySQL, initially using JDBC and later upgraded to Hibernate ORM for efficient database handling. Implemented HQL and Criteria API, entity mapping with annotations and eliminated repetitive SQL code for better scalability and maintainability.
- 

## CERTIFICATION

### EDUBRIDGE AND CAPGEMINI - JAVA FULL STACK DEVELOPMENT

JUNE-SEPT 2025

- Successfully completed an intensive Java Full Stack Development program conducted under Capgemini's CSR initiative, in collaboration with Edubridge.
- Focused on end-to-end application development, covering backend, frontend, and best practices modern software engineering.
